DETAILED ACTION

The following is responsive to Applicant's election received Oct. 30, 2002.

Upon further review of Applicant's claims and specification, the following supplemental restriction requirement is being submitted.

Supplemental Restriction Requirement

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a method of modifying vasoactivity.

Group II, claim(s) 4-15, drawn to treatment methods and pharmaceutical compositions.

Group III, claim(s) 16-18, drawn to a diagnostic method.

Group IV, claim(s) 19-21, drawn to method for modifying inflammatory reactions.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is drawn to a distinct method of modifying vasoactivity which does not require treatment of a patient as set forth in Group II. Additionally, Group III is drawn to a distinct diagnostic method which involves method steps not required by Groups I or II or IV. Finally, Group IV is drawn to a distinct method of modifying inflammatory

reactions in microglia and neurons which is not required by the claims in Groups I, II. Each group recites different methods having different method steps, different effects and different goals.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

$\alpha\beta$ pro-inflammatory pathway regulators as claimed in claims 8, 10, 12, 13, and 15.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Claims 8, 10, 12, 13 and 15.

The following claim(s) are generic: claims 1, 4, 6, 16, 19.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Other than having the common function of regulating the alpha-beta pro-inflammatory pathway, each claimed regulator affects distinct cellular mechanisms/pathways and is chemically and structurally distinct. The search for one would not be required for the other.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
